

DESTINUS is committed to achieving the highest standards of quality to ensure maximum customer satisfaction in the design and manufacture of Remotely Operated Aircraft; Turbojet Engines for UAV propulsion; and Gas Turbine solutions for power, heating, and cooling applications.

To support this commitment, DESTINUS has established, implemented, and maintains a Quality Management System (QMS) in accordance with the UNE-EN ISO 9001:2015 standard.

Management is committed to the following principles:

- 1. Continuous Improvement**
Continuously improve the effectiveness and efficiency of processes through the implementation and maintenance of the Quality Management System.
- 2. Customer Focus and Excellence**
Promote a management approach oriented toward continuous improvement, regularly updating internal processes and codes of good practice to enhance the quality of our activities and meet and exceed customer expectations.
- 3. Compliance Obligations**
Ensure compliance with customer requirements, applicable legal and regulatory requirements, and internally established standards.
- 4. Awareness and Competence**
Train, engage, and raise awareness among employees and relevant stakeholders to ensure alignment with our principles and adherence to codes of good practice.
- 5. Environmental Responsibility**
Conduct all activities with respect for the environment and biodiversity, promoting the sustainable use of resources and contributing to environmental protection, sustainable development, and pollution prevention.

Quality is the responsibility of all DESTINUS personnel, who actively contribute to the maintenance and continuous improvement of the Quality Management System.

Management commits to providing the necessary human, technical, and material resources to achieve organizational objectives and ensure the ongoing effectiveness of the QMS.
