Hornet Block 2

Dual-role system: interceptor & controlled precision strike

Intercepts drones and loitering munitions

AI-coordinated swarm operations, dynamic target allocation

Multi-domain, mobile canister-launched, all-weather

MODEL	Hornet Block 2
RANGE	150+ km
PAYLOAD	3 kg
COUNTER	<ul style="list-style-type: none"> • Strike drones • ISR drones • Loitering munitions • Helicopters
APPLICATIONS	<ul style="list-style-type: none"> • GBAD integration • (Forward) base protection • Critical infrastructure protection

A sealed-canister-launched, electrically powered interceptor that complements and fills the gap between VSHORAD and SHORAD. It delivers rapid, proportional, and cost-effective defence against strike drones, ISR UAVs, loitering munitions, and helicopters. Foldable wings and booster launch from canisters enable high-density loads on vehicles, fixed sites, and naval platforms.
