Ruta Block 2

Precision deep-strike system for hardened and high-value targets

GNSS-denied environment operation

Canister-launched: faster reaction time, enhanced mobility

Superior cost / range / payload performance

MODEL	Ruta Block 2
RANGE	700+ km
PAYLOAD	250 kg
COUNTER	<ul style="list-style-type: none">• Strategic assets• Concrete structures• Critical infrastructure
APPLICATIONS	<ul style="list-style-type: none">• Strategic operational strike• Stand-off precision attack

Designed for precision strike against high-value targets, RUTA enables low-altitude terrain-following penetration in GNSS-denied and EW-contested environments. EO/IR terminal guidance ensures accurate engagement of hardened and reinforced structures.
